HP20-585-41 – 16mm Nose Assembly.

HP20MM-585-46 – 20mm Nose Assembly.

GAGE BILT is now offering a new product for truck and trailer repair facilities, the GB585MFK. It's a low cost solution for frame repair. The GB585MFK incorporates GAGE BILT's new GBP902 air operated powerunit. Just plug it into shop air and you're ready to put in HUCK® 12mm, 16mm and 20mm 10.9 metric Huck-Fit® truck framebolts. The nose for the 16mm also installs Huck HP8® 5/8" framebolts in your Pete or KW. The GB585NT installation tool is included, as well as a 12' hose kit. The power unit is a manual foot pedal operated hydraulic power source that delivers 5,700 psi pull and return pressure with 65 psi air pressure connected to the power unit and is adjustable for higher pressures.

CAUTION: Always consult tool manual before resetting any pressures. The air pressure to the unit controls the output and return pressure to the tool and must be properly adjusted for each tool. If pressures are not adjusted properly, severe personal injury may result.
