

# ADAPTER DATA SHEET

1. Screw collet adapter (6) onto the end of the head piston. Tighten using 9/16 wrench on the collet adapter (6).
2. Insert pintail tube (5) (if required) into the collet adapter (6).
3. Screw collet extension from nose assembly onto collet adapter (6).
4. Thread anvil adapter (3) snugly into end of head cylinder until it seats. Tighten nut (4).
5. Insert anvil from nose assembly into anvil adapter (3). Slide retaining nut stop (2) over anvil and tighten nut (1).

NOTE: Remove pintail tube (5) for all right angle, offset and for 1/4" straight applications.

NOTE: Use pintail tube (8) for 1/4" blind rivets straight applications only.

NOTE: Use pintail tube (7) for lockbolts, straight applications only.

1/00 REV. 7/04
